JAVA SOFTWARE ARCHITECT / IT PROJECT MANAGER (m/w)

Role:

- Within the IT Area, you will be in charge of projects design, implementation and management of complex software applications written in Java.
- Assist team members with procedures, tools, utilities, processes & standards, act as technical leader for the projects.
- Act as a mentor, provide training on the job and advice the team on the tasks assigned.
- Actively code and refactor significant parts of the application.
- Responsible for the troubleshooting activities in case of performance and production problems.
- Responsible to design and implement long term solution to improve application and service architecture in terms of reliability, performance and cost.
- Review business documentation.

Your Profile:

- Bachelor's degree in Computer Engineering or Information Technology
- About 4 years experience in the specific role of Software Architect and/or at least 2 years in the position of Senior Software Developer
- Excellent knowledge of Java Enterprise and distributed architecture
- Direct experience of at least one major application server platform (JBoss preferred)
- Good database design and migration experience (Oracle preferred)
- Project Management, Pre-Sales as well as functional analysis skills will be considered a plus
- Good relational skills, team-oriented, stress resistant and flexible
- Fluent knowledge of both German and English language is required

What we offer:

- A friendly, dynamic and highly qualified team with experts and pioneers
- Flat hierarchies and the possibility of entrepreneurial participation
- Professional, non-bureaucratic collaboration in interdepartmental teams
- Opportunities and challenges for your personal development in a very international environment
- National and international training opportunities and career opportunities
- The daily challenge to be more committed and successful than the competition - and shared joy in our successes
